PRP Annex 9 v.11 DRAFT April 6 2016.docx

Hi Ash,

Please see attached for the current draft. Let us know if you have any comments/revisions.

Thanks,

Shivani

Hi Doug,

We've had a look and these are our suggested edits. Please have a look and see if you are ok with them/this version.

Many thanks,

Patrick

When you get a moment could you give the new proposed changes a quick glance over to see if they make sense. Generally it sounds like they do but I'd like to get your read on it.

Thanks Nancy. That works for me.

So to be clear, let's only have three years shown on the timeline and only use the one about the climate change webinars for 2014 and delete the OCC led review. I have made that change to the attached.

The one thing that concerns me is that the text as written makes it seem like the Climate Change Science report is a product of Annex 9. This is not the case, however, Annex 9 will use the report to inform us about knowledge gaps and help identify priority work in the future. I've tried to include this distinction in the PRP chapter. See what you think.

Hi Patrick

I made just a couple of edits/comments to the clean copy attached for your consideration.

Wendy

Hi folks,

We've done an initial review of Ash's proposed changes. From the policy side things look pretty good but before we go out and discuss with the US (although they already seem to be looped in) I wanted to see if there were any concerns from your perspectives on the program/science side or not.

Thanks,

Patrick

Patrick, Shivani, Nany (and Wendy?) – here's a tracked and clean version of the Annex 9 Progress Report of the Parties chapter modelled after the Annex 4 template. Note that I tried to shorten some text but there may be a need to do further trimming back of text possibly. Perhaps it makes sense for you to look at this and then send whatever version you're comfortable with back to the US side since Heather is on travel this week. If you don't like what I did feel free to change it but you do need to somehow apply / follow the Annex 4 template model.

Heather, no need to re-submit the current CCI draft.. both Jamie and I have it.

I'll work on applying the Nutrients model to the current CCI draft on Monday.

Hi Ash.

We had planned to submit our text in the current format for today's deadline. I was just about to hit send on behalf of the co-chairs. Do we not need to do that now?

If you have time to help with application to the Nutrients model then I believe we'll take you up on that offer. I will be on travel next week.

Best,

Heather

The next step will be to apply the Nutrient Annex chapter model (attached) to this CCI text.. for e.g.,

- Possibly shorten the Overview – SOLEC info may be removed completely if we're following the Nutrients Annex model.
- Including a similar "Progress Toward Meeting GLWQA Commitments" timeline graphic; would there be some key things you'd like to highlight on a similar timeline image? Possibly work towards the CCI Science Report for eg?
- Including the "This annex is implemented by the Climate Change Impacts Annex Subcommittee.." line and logos of agencies (if available) at bottom of pg 1.
- Then under "Binational Actions Taken for Key Commitments" (the next header) and put the Key Commitment in a bubble and then talk about the related activities to this Key Commitment in bullet form. You'll note there is no mention of the priorities for science and action in the Nutrients Annex model and the text is pretty concise.
- Then under "Domestic Actions Taken" talk about the specific domestic activities in bullet / paragraph form.
- No need for the "Environmental Progress" (aka SOLEC) section if we follow the Nutrients Annex model.
- Instead of a separate "References" section perhaps the links can be embedded where they are being discussed.
- Images can be used highlight the key things being discussed on the particular page.

Not sure who was going to take a stab at applying the Nutrients Annex model to this CCI text (minus the formatting which I'm assuming someone in ECCC / EPA production will be doing) but I may be able to help next week if needed to apply the Nutrients Annex model.. just let me know.

Sending along the latest PPR (v.9) with all comments incorporated. I also inserted a few possible graphics at the end. As we discussed on the last call, if other such graphics/text is needed then the hope is that we'll hear as much from our GLEC secretariats.

Best,

Heather

Hi Wendy.

Thanks much. I'll use this version and add a couple of U.S. updates from our end as well. We can elaborate on those edits, if folks have questions, during our call.

Best,

Heather

Hi Heather

I had Al Pietroniro and a couple of other ECCC people review this and we made a change to address one of the comments from Susanne Jakobsen. I am now comfortable with this going forward.

Thanks.

Wendy

Subject: Annex 9 Core Team Check in

Hi All!

Sending this out to confirm our plans to gather tomorrow at 9am CT ([1-888-560-5131](tel:1-888-560-5131) Passcode: 6388929). An agenda to guide our discussions is pasted below. I'm also attaching a number of documents that we may wish to discuss on the call. Nancy - I've included your document again here so as to put everything in one email.

Looking forward to catching up soon!

Heather

AGENDA:

- Progress of parties - Review comments received, new timeline, formatting changes necessary, graphics.
- Climate science Webinar (April 11) - Discuss Webinar Format/Agenda/Invites/Facilitation Questions; Need for other webinars?
- Review membership lists - Need help with keeping lists current; 3-year term review?
- Next A9 meeting?

- GLEC prep - who's going
